## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. The following is an examiner's statement of reasons for allowance:

Claims 1 and 10 recite an antenna measurement system for measuring the radiation characteristic of a source antenna and a method of measuring the radiation characteristic of a source antenna comprising a tester body placed apart from the source antenna with a predetermined distance, a plurality of measurement modules arranged at the tester body in a predetermined pattern, each measurement module having an IC chip for processing positional information and measured values to generate relevant signals, and a tester antenna for receiving and transmitting the signals from the IC chip, and a measurement controller for receiving the signals from the tester antenna and processing the positional information and the measured values of the respective measurement modules.

Claim 11 recites a method of measuring the radiation characteristic of a source antenna comprising the steps of arranging a plurality of measurement modules at a tester body in a predetermined pattern, each module having an IC chip for processing positional information and measured values to generate signals, and a tester antenna for receiving and transmitting the signals from the IC chip, placing the source antenna within the tester body such that the source antenna is positioned at the center of the tester body, and operating the measurement controller such that the measurement controller receives and data-processes the positional information and the measured

values from the tester antenna of each measurement module provided at the tester body.

None of the prior arts shows or suggests this antenna measurement system for measuring the radiation characteristic of a source antenna and a method of measuring the radiation characteristic of a source antenna.

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
